CANDIDATE IDENTIFIER: FP-C01 · OPERATIONAL PORTFOLIO

HR Operations & Data Reconciliation Portfolio

- **Project 1:** HRIS Data Migration & Primary Key Integrity Reconciliation
- **Project 2:** Maternity & Parental Leave Sensitive HR Data Access Tiering & Masking
- **Project 3:** Automated 3-Way Attendance-Leave-Payroll Verification Checklist
- **Timeframe:** 2024 – 2026 (FP-Previous People Operations Team)
- **Key Methods:** Primary Key Mapping, 3-Tier Access RBAC, 3-Way Cross-Ledger Pre-Audit

Project 1. HRIS Data Migration & Primary Key Reconciliation

Project 01 **Reconciling Legacy Spreadsheet Records to Unified Cloud HRIS**

• Challenge: Inconsistent employee ID formatting, masked resident numbers, and disparate hire date syntaxes across departments caused data collision risks during HRIS migration.
• Solution: Established a permanent Employee ID as the immutable Primary Key (PK); harmonized all historical employment statuses to a single cut-off baseline date.
• Verification: Built a two-way XLOOKUP reconciliation ledger matching pre/post migration record counts, department headcounts, and inactive employee status flags at 100% fidelity.
• Artifacts: Delivered comprehensive data mapping specifications and discrepancy resolution audit logs.

Scope Boundary: Backend database schema modifications were executed by the IT engineering team; candidate owned data cleansing, mapping, and audit reconciliation.

Project 2. Sensitive HR Data Access Tiering & Privacy Masking

Project 02 **Restricting Statutory Maternity, Parental, and Medical Leave Data**

• Challenge: Preventing accidental disclosure of sensitive statutory leave records and health-related personal data on shared department operational sheets.
• Architecture: Enforced a 3-tier Role-Based Access Control (RBAC) model: 1) Department Managers see only absence dates; 2) HR Operators access leave categories; 3) Executive Approver holds final authorization.
• Masking & Security: Medical certificates and personal family documentation were archived in encrypted folders with strict permissions; only anonymized leave codes surfaced on working spreadsheets.
• Impact: Maintained zero personal data leakage incidents and 100% compliance with personal information protection standards.

Scope Boundary: Operated strictly within guidelines established by corporate legal counsel; did not provide formal legal advisory.

Project 3. Automated 3-Way Attendance-Leave-Payroll Checklist

Project 03 **Standardizing Time Records ↔ Leave Approvals ↔ Department Certifications**

• Workflow: Designed an automated pre-payroll checklist executed 3 days prior to monthly close, matching biometric clock records against approved PTO requests and manager sign-offs.
• Variance Resolution: Identified 10 monthly discrepancy candidates on average; secured manager email justifications without making arbitrary ledger modifications.
• Results: Reduced audit turnaround from 180 min to 75 min (58% reduction), achieving zero post-cutoff payroll adjustment disputes.

Scope Boundary: Bank wire transfers and final payroll tax filings were executed exclusively by the finance department.
