[FULLY FICTITIOUS DOCUMENT · FOR FAIRPANEL LIVE DEMO] All entities, metrics, and profiles are created for multimodal OCR and fair assessment demonstration.

CANDIDATE IDENTIFIER: FP-C03 · CIVIC TRANSFORMATION PORTFOLIO

Seoyeon Park — Civic Innovation & Governance Portfolio

- **Initiative 1:** Tri-Department Standardized Data Security Agreement & Process Consolidation
- **Initiative 2:** Elderly-Friendly Accessible Municipal Kiosk Interface Architecture
- **Impact 1:** Eliminated 5 redundant paper application forms across 3 civil divisions
- **Impact 2:** Resolved long-standing inter-departmental liability conflicts across civil agencies
- **Governance Framework:** Personal Information Protection Act & Public Digital Service Standard Compliance

Initiative 1. Tri-Department Data Security & Process Standardization

Initiative 01 **Eliminating Redundant Paper Forms and Resolving Departmental Liability Disputes**

• Problem: Citizens requesting welfare assistance were forced to physically visit Welfare, Tax, and Registration divisions separately, submitting 5 redundant paper certificates with sensitive personal data.
• Inter-Agency Deadlock: Departments resisted unified data sharing due to ambiguous audit liability and fear of statutory privacy infractions.
• Mediation & Architecture: Drafted a Tri-Department Standardized Data Security Memorandum of Understanding (MOU) defining explicit data custody boundaries, automated API transmission, and mutual audit indemnification clauses.
• Result: Completely abolished 5 physical paper certificates, converting the service into a 1-click verified digital application that served over 40,000 citizens in year one.

Scope Boundary: Legal enforceability of the MOU was validated and approved by the Municipal General Legal Counsel.

Initiative 2. Accessible Civic Kiosk Human Interface Architecture

Initiative 02 **Human-Centered Design Principles Applied to Public Self-Service Terminals**

• Architecture: Designed simplified touch targets (minimum 48x48mm), AAA-level contrast ratios, and synthetic voice prompts tailored to hearing-impaired and elderly demographics.
• Field Usability Testing: Conducted 4 iterative sprint cycles with senior citizen advisory panels to refine terminology (replacing technical jargon with everyday language).
• Accolade: Selected as the Best Municipal Digital Transformation Case Study by the Ministry of the Interior and Safety.

Scope Boundary: Hardware deployment and on-site terminal maintenance were managed by city maintenance crews.
